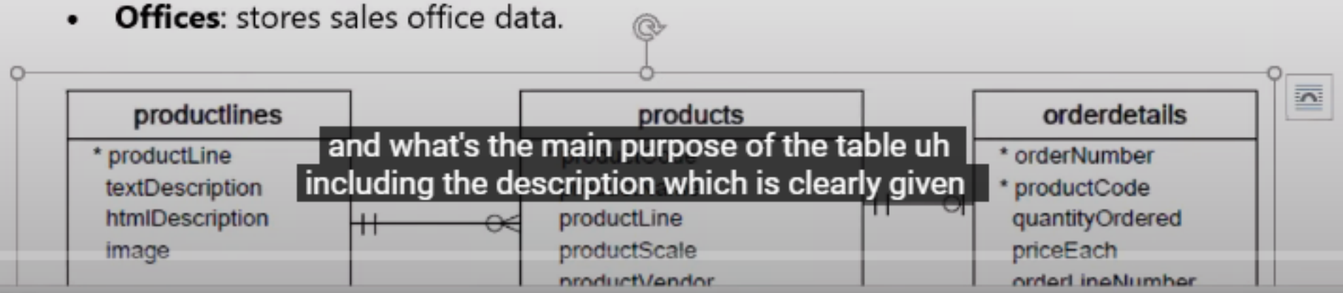
Part3 : Database Testing | How To Test Schema of Database Table | Test Cases

Database Schema (Classicmodels)

The MySQL sample database schema consists of the following tables:

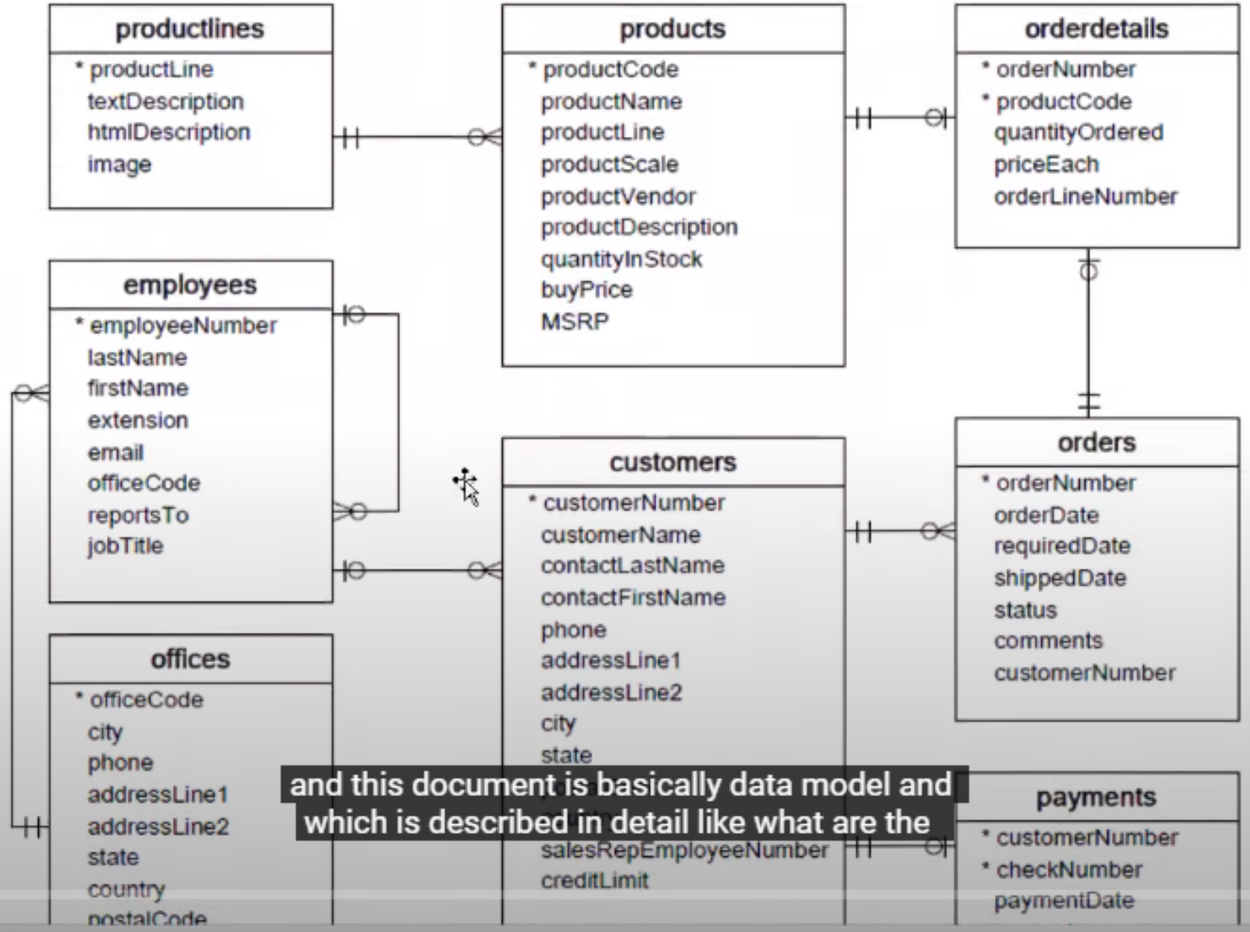
- **Customers**: stores customer's data.
- **Products**: stores a list of scale model cars.
- **ProductLines**: stores a list of product line categories.
- **Orders**: stores sales orders placed by customers.
- **OrderDetails**: stores sales order line items for each sales order.
- **Payments**: stores payments made by customers based on their accounts.
- **Employees**: stores all employee information as well as the organization structure such as who reports to whom.
- **Offices**: stores sales office data.



and what's the main purpose of the table uh including the description which is clearly given

1:03 / 30:25

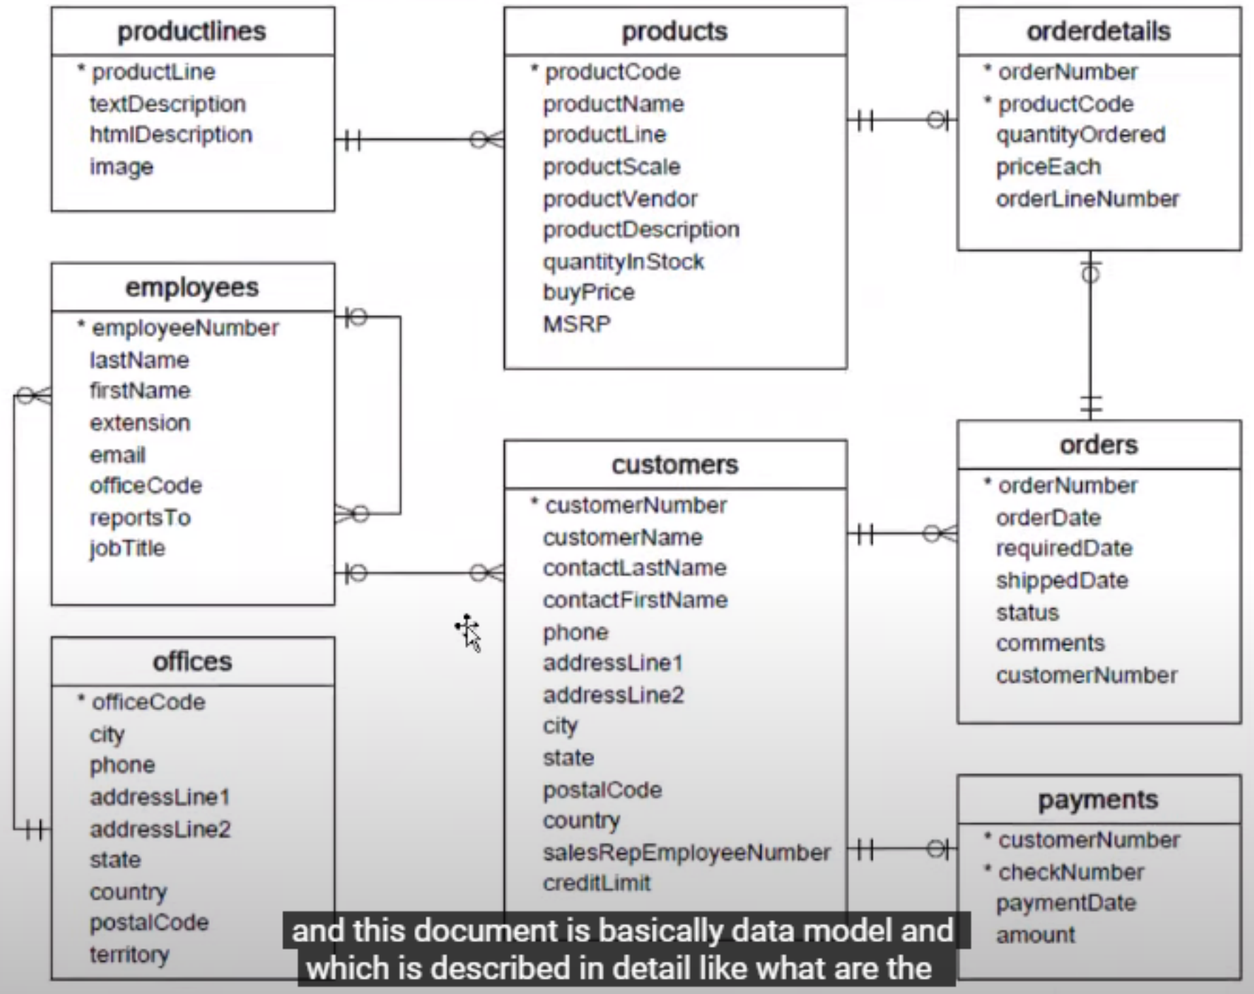
- **Employees**: stores all employee information as well as the organization structure such as who reports to whom.
- **Offices**: stores sales office data.



and this document is basically data model and which is described in detail like what are the

1:08 / 30:25

Part3 : Database Testing | How To Test Schema of Database Table | Test Cases



and this document is basically data model and
which is described in detail like what are the

1:11 / 30:25

Part3 : Database Testing | How To Test Schema of Database Table | Test Cases

Table Name	Columns	Data Type & Size	Null	Keys
Customers	customerNumber	int(11)	NO	PRI
	customerName	varchar(50)	NO	
	contactLastName	varchar(50)	NO	
	contactFirstName	varchar(50)	NO	
	phone	varchar(50)	NO	
	addressLine1	varchar(50)	NO	
	addressLine2	varchar(50)	YES	
	city	varchar(50)	NO	
	state	varchar(50)	YES	
	postalCode	varchar(15)	YES	
	country	varchar(50)	NO	
	salesRepEmployeeNumber	int(11)	YES	MUL
	creditLimit	decimal(10,2)	YES	
Products	productCode	varchar(15)	NO	PRI
	productName	varchar(70)	NO	
	productLine	varchar(50)	NO	MUL
	productScale	varchar(10)	NO	
	productVendor	varchar(50)	NO	

and if i just come down here so this is the actual requirement which we need uh to test the tables so

1:31 / 30:25

Part3 : Database Testing | How To Test Schema of Database Table | Test Cases

Products	productCode	varchar(15)	NO	PRI
	productName	varchar(70)	NO	
	productLine	varchar(50)	NO	MUL
	productScale	varchar(10)	NO	
	productVendor	varchar(50)	NO	
	productDescription	text	NO	
	quantityInStock	smallint(6)	NO	
	buyPrice	decimal(10,2)	NO	
	MSRP	decimal(10,2)	NO	

ProductLines	productLine	varchar(50)	NO	PRI
	textDescription	varchar(4000)	YES	
	htmlDescription	mediumtext	YES	
	image	mediumblob	YES	

Orders	orderNumber	int(11)	NO	PRI
	orderDate	date	NO	
	requiredDate	date	NO	
	shippedDate	date	YES	
	status	varchar(15)	NO	
	comments	text	YES	
	customerNumber	int(11)	NO	MUL

here in this database basically we have different tables like customers products product lines and
